

Timesavers 22 Series 600 WRB

Deburring Machine

The 22 series is suitable for the dry finishing and deburring of metal. This versatile machine is available in three nominal widths: 900 mm, 1050 mm and 1280 mm. It can be equipped with a total of three heads for several applications.

The machine is made for deburring and edge rounding of laser cut parts while incurring low user costs.

Special AMW price and immediate installation available!

Key Features

- Timesavers RB machine with smallest footprint
- Best budget RB entry model with perfect edge rounding
- The 4 brushes have a total of 12m² of abrasive material
- Quick tool change and low tooling & energy costs
