

Timesavers 10 Series

Deburring Machine

The 10 series is Timesavers’ versatile starter model and the cost saving alternative for manual deburring, edge rounding and/or finishing of metal. The manual grinder for fast deburring, edge rounding and finishing of metal

The different brushes can take care of deburring, edge rounding, finishing, laser oxide removal and heavy slag removal.

Special AMW price and immediate installation available!

Key Features

- Low cost and long-life tooling
- 3 - 4 times faster compared to manual edge working
- Vacuum area to keep small parts in place
- Affordable entry-level model
